Spotted Gum

Armourfloor®

Five layers of genuine hardwood

Big River Timbers Armourfloor® hardwood flooring is engineered from five layers of Australian eucalypt hardwood sheets bonded together to form a solid, stable floorboard. Each layer has its grain aligned at right-angles to the next, creating an extremely rigid structure.

- Face veneer determines species
- All hardwood core (three layers)
- Cross-ply manufacturing process (grain at 90°)
- Back veneer same as face

The special cross-ply manufacturing creates boards with the genuine beauty of forest timbers but with greater resistance to shrinkage than solid timber planks.

Armourfloor® by Big River Timbers

AUSTRALIA'S MOST STABLE TIMBER FLOORING

Four generations of expertise

The Pidcock family has been supplying quality timber products from the Northern Rivers region of New South Wales for more than 100 years. This inherited knowledge and experience forms the basis of the high-tech manufacturing process used to create engineered hardwood flooring of unsurpassed strength and beauty.

A lifetime guarantee of quality

Big River Timbers flooring is backed by a lifetime guarantee of structural integrity.

Proven under tough Australian conditions

Tests confirm that Big River Timbers engineered flooring remains stable through a range of harsh conditions, making it ideal for most residential and commercial applications, including regions with harsh climatic conditions, or for installation over heated slabs.

Manufactured from sustainable resources

It's also comforting to know your flooring is manufactured from a renewable resource. All Big River Timbers engineered flooring is milled from managed regrowth and plantation forest hardwoods.

Rich, warm hues of nature

The rich, warm hues of Australian eucalypt hardwoods vary from creams through yellows to pinks, reds and browns. There's a colour to suit every taste and lifestyle. Even within the same timber species, colour and natural markings vary, so that each individual board is imbued with its own fascinating appeal.

Factory coated or finished on site

Armourfloor® engineered flooring can be supplied as pre-finished boards (sanded, sealed and coated in the factory) or it can be finished on site to your requirements.

Old World Armourfloor®

Old World Armourfloor® boards have a factory-applied antique finish which recreates the patina of age that decades of use impart to old timber. Old World is only available with UltraCote Supermatt finish.

Rustic Ash

A unique product with a rugged bush character, heavily featured with gum veins, borer holes and ambrosia stains. Colour straw to cream and reddish brown. Rustic Ash is only available with UltraCote Supermatt finish.

These printed images provide only an approximation of the appearance of the finished floor. Because Big River Timbers engineered flooring is made from natural timber, it can exhibit variations in colour and texture. This natural variation ensures that every installation is unique. Before choosing a species, arrange to view actual samples.

Factory finished for fast installation

ARMOURFLOOR® ULTRACOTE FLOORING

Armourfloor® UltraCote floorboards are sanded, sealed and coated in the factory with a high quality surface finish, ready for easy installation. Every board is professionally finished. No mess, no disruption – floors can be installed and walked on in the same day.

- > Fast installation
- > Ready to walk on
- > 25-year surface warranty
- > Lifetime structural warranty

25-year surface warranty

Armourfloor® UltraCote flooring comes with a 25-year warranty for domestic applications, which guarantees that the coating will not wear through to the wood in that time with normal foot traffic (rugs and mats should be used for high traffic areas).

Choice of widths

Armourfloor® UltraCote flooring is available in board widths of 138mm and 189mm. Standard length is generally 1800mm but boards can be supplied up to 2400mm, subject to availability. Flooring packs delivered to site always include 35% random lengths to assist in flooring layout.

Choice of finishes

UltraCote: A professional lacquered finish applied in the factory, for a great looking floor every time. UltraCote flooring provides a medium gloss finish with approximately 50% reflectivity.

UltraCote Supermatt: This low-gloss matt coating has a very low reflectivity of 10% which enhances the natural look of timber. It emulates oil and wax finishes, but with the superior properties of a UV coating. The Supermatt coating outperforms UV-curable oils and industrial parquet oils by a factor of up to 6:1 in durability and life expectancy.

UltraCote Commercial: This specialised Commercial coating provides optimum protection for timber floors, delivering the ultimate in hardness and resistance to wear. The gloss coating has approximately 40% reflectivity. The coating is at least twice as resistant to abrasion, impact and wear as conventional UV finishes. The factory-applied, multi-layer, UV-cured finishing system uses patented technology to provide extreme hardness while maintaining flexibility. Five-year surface warranty on commercial installations, plus 25-year surface warranty on domestic installations.

Simple to install

Armourfloor® UltraCote flooring is supplied with machined tongue-and-groove joints for ease of installation. It can be installed on virtually any flat surface - over concrete, tiles, or even existing timber floors. For further details on installation, refer to the product manual on the Big River Timbers website.

ARMOURFLOOR® CUSTOMCOTE FLOORING

Armourfloor® CustomCote flooring is supplied with a natural finish for those who prefer a customised coating to suit their décor.

- Finished to your requirements
- Lifetime structural guarantee
- Wide colour range
- Native eucalypt hardwoods

Choose your own finish

Armourfloor® CustomCote flooring is supplied as semi-finished grain-filled boards ready for installation and finishing, allowing you to select a high or low gloss coating to suit your requirements.

Easy to work with

The structural integrity of Big River Armourfloor permits its use in a wide range of applications and a variety of installation methods:

- Tongue and groove floating floor over concrete or timber sub-floors
- Glued directly to concrete sub-floors
- Glued directly to underlay fixed to timber or concrete sub-floors
- Glued directly to strip timber or structural timber sub-floors
- Top-nailed to battens fixed to concrete or timber sub-floors
- Top-nailed directly to joists

Choice of widths

Armourfloor® CustomCote flooring is available in board widths of 138mm and 189mm. Standard length is generally 1800mm but boards can be supplied up to 2400mm, subject to availability. Flooring packs delivered to site always include 35% random lengths to assist in flooring layout.

Armourtile™ Custom Floor

Natural hardwood flooring

SHAPED TO FIT YOUR LIFESTYLE BY BIG RIVER TIMBERS

Because Big River Timbers engineered flooring is a manufactured product, it can be supplied in different shapes, either as standard floorboards, as large panels, or as timber tiles.

Big River Timbers also manufactures a laminated stair tread of equal strength and stability. Unlike large section solid timber stair treads, it is highly resistant to shrinkage. It can also be used to create bench tops, stair trims, tabletops, balusters, handrails and posts.

- > Floorboards
- > Structural Panels
- > Timber Tiles
- > Stair Treads

Caring for your Big River Timbers floor

Timber floors, if properly finished, are easy to keep clean and new looking. Unlike carpeted or resilient floors that show age regardless of care, timber floors can be kept looking like new, year after year, with minimum care.

1. Armourtile™ timber tiles
2. Armourpanel™ structural plywood
3. Armourtread® stair treads
