## Armourfloor® laminate flooring Australia's most stable laminate floor

### From Big River Timbers

Big River Timbers, manufacturer of Australia's most stable hardwood flooring, has broadened its product range with the introduction of a laminate flooring product with the same high quality and reliability as its renowned engineered timber flooring.

Armourfloor® laminate flooring is an exceptionally stable, environmentally friendly flooring alternative with the look and feel of genuine timber.

A finely textured surface gives the flooring an authentic timber feel, while a variety of realistic designs provides a choice of colour schemes to suit particular decors and lifestyles.

The boards are locked together without glue, using a patented jointing system, which provides a secure joint that also allows planks to be removed and replaced if required.

### Outstanding stability

The secret of Armourfloor® laminate flooring's exceptional stability is the 8mm thick base, which is manufactured from high density fibreboard (HDF) rather than the medium density fibreboard used in many other laminate products. An added benefit is that the base is manufactured using low-emission materials.

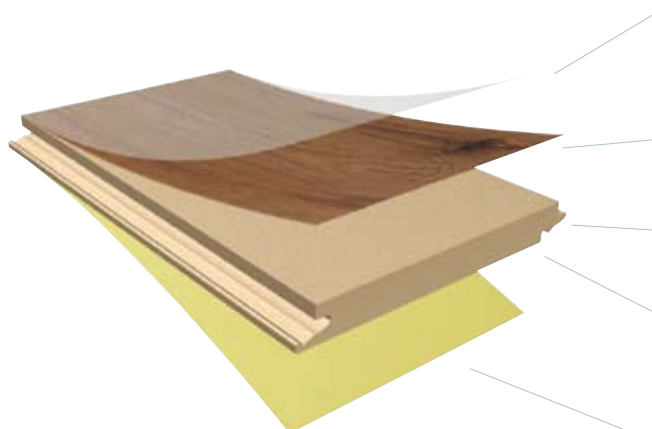

### Hi-tech wear layer

A durable, scratch-resistant surface layer provides the ultimate in long-term, low-maintenance good looks. The wear layer has a surface density of 1200 kg/m<sup>3</sup> and is manufactured from special stain-resistant material, ensuring easy maintenance and cleaning.

### Easy installation

Thanks to the simple locking mechanism, Armourfloor® laminate flooring is ideal for do-it-yourself installation.

laminate

#### Hi-tech wear layer

Increases scratch resistance, durability  
Contains nano-silver and bio-ceramics

#### Decorative Layer

Variety of colours and textures

#### Eco friendly HDF core

Low emissions, high stability

#### Tongue and groove installation

Glueless locking joint produced under licence of the Unilin® group

#### Backing layer

Enhances water resistance and prevents bending

## Eco friendly

Armourfloor® laminate flooring is manufactured using environmentally friendly practices.

The base of the flooring is E1 Grade HDF, which reduces formaldehyde emissions as well as increasing the floor's stability.

## Healthy

The ultra-tough wear layer on Armourfloor® laminate flooring is impregnated with microscopic particles that help keep the floor germ-free and promote the health of occupants.

## Guaranteed quality

Armourfloor® laminate flooring comes with a 20-year warranty on domestic installations covering surface wear and structural integrity, and a 5-year warranty on commercial applications.

- Genuine timber look
- Finely textured surface
- Glueless mechanical joints
- Easy installation
- Durable, scratch-resistant surface
- Stable, moisture-resistant core
- Eco-friendly low-emission materials
- Nano-silver protects against bacteria
- Bio-ceramic surface emits infrared energy
- Stain-resistant for easy cleaning

## Warranties

**Domestic:** 20 years

**Commercial:** 5 years

## Specifications

**Abrasion Resistance:** Class AC3

**Installation:** Glueless profiled joint

**Core:** Moisture-resistant HDF

**Edge Protection:** All edges sealed with low molecular paraffin polymerised solution

**Surface Treatment:** LPM/Genuwood Overlay

**Thickness:** 8mm

**Board Size:** 190mm x 1200mm

**Pieces per Box:** 7 (1.596 square metres)

**Boxes per Pallet:** 64

## Load Applications

**Domestic:** General loads such as living, dining and children's rooms (Euro-Nrm Class 23)

**Commercial:** Moderate loads such as small offices and hotel rooms (Euro-Norm Class 31)

stable

## For flooring you can rely on, look for the Big River Timbers brand

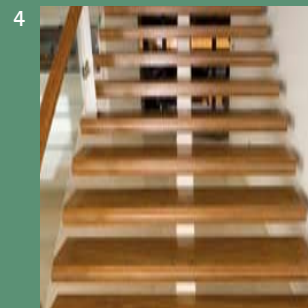

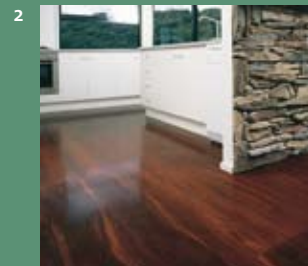

For more than 100 years this Australian family-owned company has been supplying quality timber products from Grafton, in the Northern Rivers region of New South Wales. Today the Big River Timbers name is also synonymous with high quality hardwood flooring.

When Big River Timbers began manufacturing its own hardwood flooring, it was able to call on its inherited knowledge and experience to ensure its products were of the highest quality. A high-tech manufacturing process was developed to create engineered flooring of unsurpassed strength and beauty.

This innovative product, Armourfloor® engineered hardwood flooring, has come to set the standard for durable, stable timber flooring. It is made from five layers of hardwood veneer bonded together to form a solid board that remains stable throughout a range of harsh climatic conditions.

And now Big River Timbers offers an imported laminate flooring product with the same quality and reliability as its engineered timber flooring.

When you see the Big River Timbers brand, you know you are purchasing flooring manufactured to the highest international standards and backed by a century of family know-how.

- 1 Armourfloor® engineered flooring
- 2 Armourpanel™ decorative plywood
- 3 Armourtile™ timber tiles
- 4 Armourtread® stair treads
